BUREAU CIRCULAR NO. 1407

To All Members of the Bureau:

Re: PREMIUM ALGORITHM
EFFECTIVE ON AN OPTIONAL BASIS JULY 1, 2000
EFFECTIVE ON A MANDATORY BASIS JANUARY 1, 2002

The Bureau has filed and the Insurance Commissioner has approved the development of a premium algorithm that will set forth specifically the sequence and arithmetic calculation of workers compensation premium. Such calculations have become increasingly detailed and complex by virtue of the growing number and variety of special pricing programs applicable to workers compensation insurance created by virtue of both legislative enactment and competitive initiative, which has increased an interest in accounting for and analyzing the impacts of certain of these available programs. This new program will be **effective on an optional basis July 1, 2000** and on a **mandatory basis** for new and renewal policies with normal anniversary rating dates on or after **January 1, 2002**. The addition to the Basic Manual is shown below. *Please note that all references to Delaware are pending filing with and approval by the Delaware Insurance Commissioner.*

SECTION 1

RULE VI - RATING VALUES AND PREMIUM DETERMINATION

G. PREMIUM ALGORITHM

Pennsylvania and Delaware Premium Algorithm Preface:

Optional use upon July 1, 2000. Mandatory use for policies effective on or after January 1, 2002.

The computation of workers compensation premium includes a broad complement of potential rating values, pricing programs and other similar or related variables. To the extent that these component parts of premium determination may be applied in a prescribed sequence and using defined formulas and/or relationships, several potential benefits arise including the following:

- Competitive differences within the marketplace can be more clearly defined and consistently applied;

- Similarly situated risks can receive comparable treatment with respect to specific rating values, pricing programs or other factors, increasing the equity of the marketplace;
- Analysis of the effects of various components of overall premium determination can be better understood and more intelligently compared across carriers, states and/or time;
- In the event that new pricing programs or other factors are introduced in the future, the defined existing formulas can provide a consistent basis for the development of programs and system procedures within the workers compensation industry.

Pennsylvania and Delaware Workers Compensation Premium Algorithm

Premium Calculation Algorithm

| <u>Line #</u> | <u>Item Name</u> | <u>Associated Statistical Code</u> | <u>Line #</u> | <u>Source & Derivation</u> |
|---------------|---|--|---------------|--|
| (1) | <u>Classification</u> | <u>XXXX</u> | (1) | <u>Carrier value</u> |

| (52) | <u>Package Credit Factor (DE)</u> | 9721 | (52) | Carrier value |
| (53) | <u>Package Credit (DE)</u> | 9721 | (53) | [(39)+(41)+(45)+(47)+(49)+(51)]x[(-52) expressed as a decimal] |
| (54) | <u>Premium After Managed Care and Package Credit If Applicable</u> | | (54) | [(39)+(41)+(43)+(45)+(47)+(49)+(51)+(53)] |
| (55) | <u>Assigned Risk Surcharge Factor (DE)</u> | 0277 | (55) | May apply to some or all assigned risks based on plan and characteristics of individual insured |
| (56) | <u>Assigned Risk Premium Surcharge (DE)</u> | 0277 | (56) | (54)x[(55) expressed as a decimal] |
| (57) | <u>Deductible Credit Factor</u> | 9663 | (57) | Carrier value |
| (58) | <u>Deductible Premium Credit</u> | 9663 | (58) | [(54)+(56)]x[(-57) expressed as a decimal] |
| (59) | <u>Loss Constant</u> | 0032 | (59) | Carrier value - may vary based on risk premium size |
| (60) | <u>Loss Constant Charge</u> | 0032 | (60) | Line (59) if applicable |
| (61) | <u>Short Rate Cancellation Factor</u> | 0931 | (61) | Carrier value - zero if short rate cancellation does not apply |
| (62) | <u>Short Rate Premium</u> | 0931 | (62) | [(54)+(56)+(58)+(60)]x[(61)-1.0000] if (61) > 0, otherwise zero |
| (63) | <u>Expense Constant</u> | 0900 | (63) | Carrier value |
| (64) | <u>Expense Constant Charge</u> | 0900 | (64) | Line (63) if applicable |
| (65) | <u>Minimum Premium</u> | 0990 | (65) | Carrier value |
| (66) | <u>Minimum Premium Charge</u> | 0990 | (66) | If (65) > [(54)+(56)+(58)+(60)+(62)+(64)], (65) - [(54)+(56)+(58)+(60)+(62)+(64)], otherwise zero |
| (67) | <u>Unit Statistical Report Total Standard Premium</u> | | (67) | [(54)+(56)+(58)+(60)+(62)+(66)] |
| (68) | <u>Premium Discount Amount</u> | 0063/0064 | (68) | Carrier value based on [(54)+(56)+(58)+(60)+(62)+(64)+(66)] |
| (69) | <u>Total Premium</u> | | (69) | (64)+(67)-(68) |
| (70) | <u>Employer Assessment Factor Pursuant to Act 57 of 1997 (PA)</u> | 0938 | (70) | Bureau value for the specific purpose of computing employer assessments |
| (71) | <u>Employer Assessment Amount Pursuant to</u> | 0938 | (71) | [(69)-(11)-(58)]x(70) NOTE: Cells (11) and |

Act 57 of 1997 (PA)

(58) are credits. Subtracting these credits as shown effectively adds the premium reduction given for deductible coverage back into the premium for purposes of calculating employer assessments.

Questions concerning the premium algorithm should be directed to Bruce Decker, Vice President - Public Information & Statistical Reporting, at Extension 223 or bdecker@pcrb.com.

Manual reprints will be distributed in the usual manner.
