PENNSYLVANIA COMPENSATION RATING BUREAU

Table I

Table I presents premium and loss data which forms the basis for calculating development factors and projecting ratios of actual losses to expected losses by policy year. Losses are shown on a paid and case incurred (paid plus outstanding, excluding bulk and IBNR) basis split between indemnity and medical.

The data represents a summary of accumulated policy year experience as reported by carriers in the annual Financial Calls for Experience.

Two sets of development factors are shown measuring the development from December 31, 1999 to December 31, 2000 and also from December 31, 2000 to December 31, 2001. So as to maximize the use of available data, the companies used in one stage of development are allowed to be independent of those used in the other stage of development; therefore, the figures shown for the December 31, 2000 valuations may vary.

Experience for large deductible policies has been excluded from Table I. Losses attributable to catastrophe code 48 have been included.

Table I - Pages 1-6 - Reported Data

The data on pages 1-6 represent the experience as reported by the carriers. Consequently, the 12/31/99, 12/31/00 and 12/31/01 valuations of losses reflects the impact of changes legislated by ACT 44 and ACT 57. Specifically, medical payments for many services rendered subsequent to 8/31/93 are influenced by the medical fee schedule now in place. Medical case reserves at 12/31/99, 12/31/00 and 12/31/01 are also at a level that reflects some measure of anticipated savings as a result of the fee schedule and other features of ACT 44.

Table I - Pages 7 - 16 - Adjustment to reflect ACT 57 indemnity savings

In order for the loss development patterns suggested by the financial data to be usable it is necessary that the indemnity payments and indemnity case reserves be put on a consistent basis with regard to benefit levels. For the 2003 filing all indemnity payments and reserves are being adjusted to a post-ACT 57 basis.

Pages 7 - 16 show the adjustments to bring indemnity losses to post-ACT 57 levels for Calendar Years 1992 through 2001 respectively. The immediate savings in indemnity payments resulting from Act 57 is estimated at 12.01%. It is further estimated that case reserves at year-end 1996

had not been adjusted by carriers to reflect post-Act 57 benefit levels. For year-end 1997, it is estimated that an average of one-third of reserves have been adjusted to post-ACT 57 levels. For year-end 1998, a figure of two-thirds has been used. For year-ends 1999 and subsequent, it is assumed that all reserves have been adjusted to post-ACT 57 levels. A full discussion of the methods used to adjust the data was included in Exhibit 4 of the Pennsylvania April 1, 2000 filing.

Page 7 shows the adjustment to calendar year 1992. Successive pages (through page 16) adjust later calendar year contributions to a post-Act 57 basis.

Table I - Pages 17-26 - Adjustment to reflect ACT 44 medical savings

In order for the loss development patterns suggested by the financial data to be usable it is necessary that the medical payments and medical case reserves be put on a consistent basis with regard to benefit levels. As was done in last year's filing, all medical payments and reserves are being adjusted to a post-ACT 44 benefit level. A full discussion of the methods used to adjust the data was included in Exhibit 4 of the Pennsylvania April 1, 1999 filing.

Pages 17-26 show the adjustments to bring medical losses to post-ACT 44 levels for Calendar Years 1992 through 2001 respectively. The immediate savings in medical payments resulting from Act 44 is estimated at 29.18%. It is further estimated that case reserves at year-end 1993 had not been adjusted by carriers to reflect post-Act 44 benefit levels. For year-end 1994, it is estimated that an average of one-third of reserves have been adjusted to post-ACT 44 levels. For year-end 1995, a figure of two-thirds has been used. For year-ends 1996 and subsequent, it is assumed that all reserves have been adjusted to post-ACT 44 levels.

Page 17 shows the adjustment to calendar year 1992, the latest calendar year period unaffected by Act 44 and therefore the starting point in the derivation of a post-Act 44 Table I. Successive pages (through page 26) adjust later calendar year contributions to a post-Act 44 basis.

Table I - Pages 27 - 32 - Adjusted to Post -ACT 44 and Post - ACT 57 levels

Pages 27-32 reflect the adjustment to medical costs to bring all data to a post-ACT 44 level and the adjustment to indemnity costs to bring all data to a post-ACT 57 level. This data was the basis for all subsequent loss development and trend analysis.
