PENNSYLVANIA COMPENSATION RATING BUREAU

Hepatitis C Surcharge

In response to H.B. 1633, legislation dealing with Hepatitis C as an occupational disease, the Bureau has made adjustments to proposed class indications based on current experience that does not reflect the increased exposure to the Hepatitis C virus.

Page 1 shows an indemnity and medical cost per HCV claim. Page 2 shows the HCV surcharge and proposed loss cost for the four classifications subject to this exposure.

Please note, classes 993 and 996 are combined for ratemaking purposes and are assigned the same loss cost. However, code 996 is not subject to this exposure and will not receive this surcharge, resulting in different loss costs for these classes.
